

Ruhr-Universität Bochum (Ruhr University of Bochum – RUB) is acknowledged as one of the leading research universities in Germany. As a reform-oriented campus university, it uniquely combines the entire range of key academic disciplines in one place. The dynamic interaction between the various subjects and branches of science offers researchers and students alike excellent opportunities for interdisciplinary collaboration.

The Universitätsklinikum der Ruhr-Universität Bochum (UK-RUB) is a syndicate of teaching hospitals and specialist medical facilities in the Bochum, Herne, and Ostwestfalen-Lippe region that work in partnership with the Ruhr University. The UK-RUB stands for exceptional patient care in conjunction with outstanding research and teaching in the field of university medicine. The UK-RUB works in cooperation with numerous academic teaching hospitals associated with the RUB, including the Hemer Lung Clinic.

The Katholisches Klinikum Bochum is a maximum care hospital group with overall responsibility for ten facilities. The six facilities comprising St. Josef-Hospital, St. Elisabeth-Hospital, St. Maria-Hilf-Krankenhaus, Marien-Hospital Wattenscheid, Martin-Luther-Krankenhaus and Klinik Blankenstein, treat more than 240,000 in- and outpatients from the entire region on an annual basis. A team consisting of more than 5,500 employees combines cutting-edge medicine with top-level research.

At St. Josef-Hospital, the Medical Clinic V for Hematology and Oncology with Palliative Care Medicine, working in cooperation with the Hemer Lung Clinic, has an opening – as of April 1, 2025 – for a

University Professorship (equivalent to pay grade W2) for Internal Medicine and Pulmonology as Section Head of Interventional Endoscopy – Thoracic Tumors

Medical Clinic V has 72 beds (including 7 beds in the palliative care unit) and treats more than 4,000 inpatients and 15,000 outpatients every year. The clinical spectrum covers every aspect of medical oncology and hematology (with the exception of stem cell transplants), the focus being on tumors of the digestive organs and thoracic oncology. Since 2024, the Clinic has been part of the certified Lung Cancer Center in Hemer, one of the largest facilities for lung tumors in Germany, which in turn has been affiliated with the RUB Oncology Center (RUCCC) since 2021. The aim is to extend the Clinic's activities in the field of pulmonology and thoracic oncology as part of a cross-site role (Hemer/Bochum) in interventional endoscopy relating to thoracic tumors.

The successful candidate will be expected to integrate into the Faculty's principal research areas (oncology, neurosciences, and protein sciences). Ideally, this will be complemented by clinical-scientific collaborative efforts with institutions of the Faculty of Medicine and the UK RUB in the current focal areas of research and development as well as participation in existing and future collaborative research projects.

The following credentials are essential to this position:

- Junior professorship (including a positive evaluation of this role), post-doctoral

lecturing qualification or, alternatively, equivalent academic achievements

- Qualification as a board-certified specialist (equivalent to "Facharztanerkennung" in Germany) in internal medicine and pulmonology
- Several years of expertise in diagnostic and interventional pulmonary endoscopy

In addition to outstanding academic qualifications with high-end exposure at an international level, a successful track record in obtaining external funding, and a commitment to participating in academic self-administration, applicants are expected to meet the following requirements:

- Proof of particular aptitude for academic teaching and a high level of commitment within this field
- Willingness to engage in interdisciplinary academic work
- Desire and demonstrable ability to acquire externally funded research projects

The appointment procedures will be conducted by Ruhr-Universität Bochum in agreement with St. Josef-Hospital. Employment will be on the basis of an employment contract under private law. Affiliation with the University shall be governed by the provisions set out in Section 9 (2) HG NRW.

RUB and Katholisches Klinikum Bochum gGmbH stand for diversity and equal opportunities. With this in mind, we are committed to fostering collaboration within diverse teams and promoting the careers of those who are underrepresented in their respective areas of work. RUB expressly encourages applications from women. As regards areas in which they are underrepresented, they will be given preferential consideration in those instances in which they are equally qualified. We also welcome applications from people with disabilities.

Please submit your application with the usual documents (cover letter, curriculum vitae, academic record, copies of certificates/diplomas, list of publications, proof of special aptitude for academic teaching, list of courses, details of research interests and clinical focal points, list of external funding) and the application form of the Faculty of Medicine (http://www.medizin.ruhr-uni-bochum.de/dekanat/sachgebiete_service/berufung.html) within six weeks in digital format only to:

Frau Prof. Dr. med. Andrea Tannapfel
Dekanin der Medizinischen Fakultät
Ruhr-Universität Bochum
Universitätsstr. 150, 44801 Bochum
berufungen-medizin@ruhr-uni-bochum.de

as well as to

Herrn Prof. Dr. med. Christoph Hanefeld
Sprecher der Geschäftsführung
Katholisches Klinikum Bochum gGmbH
Gudrunstr. 56, 44791 Bochum
gf@klinikum-bochum.de
